

Anjali Nennelli is a mobile technologist and is entrepreneurial by choice. With her passion for mobile & IoT, she is keen to adapt when it comes to the capricious nature of the tech industry.

The developer of many apps on multiple platforms, including her current product [Trill](#), Nennelli, who has her masters in engineering, has always harbored an interest in women's role within the technology industry. She's had hands on experience and expertise with mobile devices and their ecosystems since the early days of its platform emergence. She has a keen product eye which has helped her win multiple Product awards.

With over 14 years in tech industry, Nennelli has worked in software solutions from startups to large-scale enterprise architecture. In the past she was employed at Choice Hotels International as a mobile engineer and Mokriya as their mobile architect and lead developer, before striking out on her own. She's now on a mission to disrupt the business card industry with technology using Trill.

Nennelli is a regular speaker and panelist at various events. Currently in its fifth year, [Phoenix Mobile & IoT Festival](#) is Nennelli's passion project; she's thrilled to use her thought leadership to bring people together to witness the cutting edge technology, and along with her apps, hopes to make a great difference in this world.
